
Let a Hobart Work For You Before You Buy

**You can own a Hobart Arc Welder
with practically no expense**

We will place any Hobart Welder with you, to use on your jobs, at our risk, for a small down payment, and if you are not most enthusiastic over its results you may return it within 15 days freight collect or 30 days freight prepaid, and we'll immediately refund without question every cent you have paid us. We know that SIMPLIFIED Arc Welding is much faster, easier to operate and outstandingly better than any other welders, that we insist on this liberal trial. Don't take our word for performance of the Hobart Welder . . . try it in your own shop.

With the New HOBART ARC WELDER

**you start cutting costs
immediately . . . and pay
the cost of the new equip-
ment OUT OF SAVINGS**

*Don't take anybody's word on the ease
and speed of this New Arc Welding.
A trial on your own work, at our risk,
will prove the big advantage of Hobart.*

Payment Plan

FILL IN AND MAIL TODAY FOR 30 DAYS TRIAL

..... In Your Shop At Our Risk

To: The Hobart Brothers Co., Trial Dept., Troy, Ohio

Send me via (freight) (truck), subject to my 30 days trial and approval, the Hobart Welder I've checked below:

Rental Plan

RENT A NEW HOBART WELDER

FOR YOUR RUSH JOBS

All Rent Can Apply Toward the Purchase Price Without Loss

FILL OUT BELOW AND MAIL TODAY

To Hobart Brothers Co., Rental Dept., Troy, Ohio

Send the Hobart Welding Equipment checked below subject to your regular rental agreement.

In consideration of shipment of the Welder checked, I agree to accept shipment, paying all transportation charges and will pay Hobart Brothers as rent 10% of the value of Welder and Equipment, rent to be paid each month in advance. I enclose with this rental order \$..... for the first month's rental and plan to use the Equipment approximately months. Send rental forms at once for my signature.

It is understood that if, during the life of this agreement, I wish to purchase the equipment outright, I may do so by paying the Hobart Brothers Company an amount equal to the valuation of the equipment, less the rental I have paid plus an interest charge of ½ of 1% per month, starting at the date of this agreement. The balance paid in cash or on the Hobart Easy Monthly Payment Plan.

★ HOBART ★ POLICY

The Hobart Trial and Budget Plan lets every factory, shop, or person interested in Arc Welding realize the outstanding advantages of the new 40 Volt **SIMPLIFIED** Welding, and then own it on "Pay-For-Itself" Terms. The new Hobart Welders do so much more for you than old style welding, and will prove so economical and profitable on your work that we have adopted the Trial and Budget Plan of owning. Briefly, it's a plan that lets you try **SIMPLIFIED** Arc Welding in your own shop on your work before you buy, and if you wish, lets you pay for it out of profits and savings with practically no expense to you.

— 12 —

Only Hobart Gives All These Advantages . . .

Exclusive Remote Control on every Hobart. The biggest advantage in years. Operator controls heat and current at the work.

Selective Automatic Reactance Control is inbuilt and guarantees easier welding on either light or heavy work.

Exact Volt-Amp Control . . . This unique control lets you obtain 1000 different combinations of heat and current, giving you the exact setting for every job.

Dependable Excitation. Oversize four-brush exciter insures quick pick-up, speedier welding, freedom from reversal. A built-in feature.

Efficient Ventilation. Hobart's heavy duty fan mounted on armature shaft changes air twice as often as in machines with end-to-end ventilation.

Handy Polarity Switch. Polarity is changed by merely flipping a small switch. Polarity can be checked with a glance at the meters.

Make a feature-by-feature comparison

★ Prices on the new Hobart Arc Welding Machines are the lowest they've been in twenty years. With the tremendous advantage these new 40 volt Welders give you, there has been a temptation for some makers to eliminate vitally important features in order to reduce manufacturing costs and make extra profits. Some take off the exciter. It easily costs \$100.00 less to build a Welder without an exciter—even though the performance isn't equal in any way.

★ Others increase the speed to 3600, because it takes only half the copper and steel to build high RPM Welders, but life is materially shortened.

★ **STABILIZATION** — Some manufacturers have eliminated reactance because it saves them \$50.00 or \$60.00. Hobart's Multi-Range design employs special windings, extra turns and added copper to provide reactance that gives exceptional stability in all ranges. That's why Hobart is known as the "all purpose welder."

★ Whether your work be light, medium or heavy—with plain, coated, ferrous, non-ferrous, or carbon electrodes—in downhand, vertical, horizontal or overhead positions—Hobart gives you just what you want, easily and quickly.

— 11 —

If You Need a Welder . . .

. . . in a hurry for a temporary rush job, or if you feel that your jobs are not big enough to justify the purchase of a Hobart Welder—use the Hobart Rental Plan. This lets you rent a modern Hobart Welder for any period of time—then if you decide to purchase—all rent you have paid applies without loss on the purchase price. Ask about the Rental Purchase Plan.
